

### WATER TESTING

Water source	Ion Tested	Test Result	Why did you test for this ion?

On a separate sheet of paper answer the following questions. 1. For each test you ran, restate the result and tell me what this result means. For example, is the test result desirable or not? Why? 2. Now look at the class data. Are there any differences in the results? Explain. 3. What are some feasible explanations for these differences?
